Gusbourne

Gusbourne is the only three-time winner of the IWSC English Wine Producer of the Year. Exacting standards guide Gusbourne's winemaking team from pressing grapes in whole bunches through to blind-tasting, blending and extended ageing on lees and cork. Only the best quality fruit is harvested, all hand-picked by their skilled vineyard team. Gusbourne's unique terroirs and mild microclimates add their own depth and complexity.

Philipponnat

Established in the heart of the Champagne wine growing area, Philipponnat possesses a unique heritage. Its magnificent, historic 18th-century cellars were part of the Château de Mareuil. Philipponnat has owned an exceptional walled vineyard, unparalleled in the Champagne wine-growing area for nearly a century: Clos des Goisses. It is also the region's warmest terroir. Facing due south, this pure chalk slope receives no shade from sunrise to sunset. Philipponnat crafts its wines using exclusively first press juice from the finest grapes, mainly from Premier and Grand Cru plots.

GranMonte

From Khao Yai, Thailand, and in a valley with gentle slopes, GranMonte Estate has the ideal mesoclimate for growing high-quality grapes for winemaking in a wet tropical region. They use only the finest and freshest estate-grown produce, and their innovative winemaking techniques capture all the important aromas and tastes that set their products apart. GranMonte's viticulture and winemaking techniques are tailor-made to suit the soil and climate conditions particular to Thailand, leading to GranMonte's high-quality products which are dubbed "The best fruit of Thai soil, bottled."

Chapter & Verse and Domaine Franco-Chinois

These two sister vineyards lie in Hebei's Huailai County. The nearby Guanting Reservoir helps to regulate humidity and temperature. Flanked by the Yan Mountains to the north and the Taihang Mountains to the south, Huailai's vineyards benefit from a natural barrier that forms a unique "two mountains and one lake" terrain. The combination of suitable climate, optimal exposure to sunlight, and significant temperature differences between day and night allow grapes to ripen to perfection, translating into fresh and fruity wines with flavorful notes.
